HARMAN Automotive

Dear Hiring Manager,

I am writing to apply for the **Software Development Intern** position at HARMAN Automotive. As a soon-to-be B.Tech graduate in Computer Science from ABES Engineering College, I am eager to contribute to your team and expand my skills in embedded software development.

My academic background and internships at Cognifyz Technologies and Code-Clause have provided me with hands-on experience in **C, C++, Python, JavaScript**, and **MERN stack development**. Projects like **Drive-Connect** and **Sale-Sage** strengthened my skills in **JWT authentication, role-based access control**, and **data analysis**—essential for building secure and reliable systems.

I am particularly excited about HARMAN's focus on **embedded RTOS, Android, C++, and Linux**. My familiarity with debugging, unit testing, and agile methodologies aligns well with the requirements of this role. Additionally, my leadership roles and hackathon participation demonstrate my commitment to collaboration and continuous learning.

I am confident that my technical foundation, combined with a strong work ethic and passion for innovation, would make me a valuable addition to the HARMAN team. Thank you for considering my application. I look forward to discussing how my background aligns with your goals.

Sincerely,
Kartikey Gupta
